Corporate Presentation –September 2026

Mammoth Minerals

ASX : M79

DISCLAIMER

This presentation contains summary information about Mammoth Minerals Limited (Mammoth) (ACN 651 057 822) and is current as of cover date. The information in this presentation is of a general background and does not purport to be complete. This presentation is not investment or financial product advice (nor tax, accounting or legal advice) and is not intended to be used for the basis of making an investment decision.

The information contained in this presentation has been prepared without taking into account the objectives, financial situation or needs of individuals. Investors should obtain their own advice before making any investment decision. Mammoth has prepared this document based on information available to it at the time of preparation. No representation or warranty, express or implied, is made as to the fairness, accuracy or completeness of the information, opinions and conclusions contained in this presentation.

Forward-looking statements

This presentation contains certain “forward-looking statements”. Forward looking statements can generally be identified by the use of forward-looking words such as, “expect”, “should”, “could”, “may”, “predict”, “plan”, “will”, “believe”, “forecast”, “estimate”, “target” and other similar expressions. Indications of, and guidance on, future earnings and financial position and performance are also forward-looking statements.

Forward-looking statements, opinions and estimates provided in this presentation are based on assumptions and contingencies which are subject to change without notice, as are statements about market and industry trends, which are based on interpretations of current market conditions. Forward-looking statements including projections, guidance on future earnings and estimates are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance.

This presentation contains statements that are subject to risk factors associated with Mammoth and the mining exploration industry. It is believed that the expectations reflected in these statements are reasonable, but they may be affected by a range of variables which could cause actual results or trends to differ materially. Mammoth disclaim any intent or obligation to publicly update any forward-looking statements, whether as a result of new information, future events or results or otherwise. To the maximum extent permitted by law, Mammoth, their related bodies corporate (as that term is defined in the Corporations Act 2001 (Cth)) and the officers, directors, employees, advisers and agents of those entities do not accept any responsibility or liability including, without limitation, any liability arising from fault or negligence on the part of any person, for any loss arising from the use of the presentation or its contents or otherwise arising in connection with it.

Competent Persons Statement

The information in this presentation that relates to the Exploration Results for Excelsior & Bella Gold Projects, Skyline Copper Project and Picha and Charaque Projects, Peru is based on information compiled and fairly represented by Mr Glenn Poole, who is a Member of the Australian Institute of Geoscientists and employee of Mammoth Minerals Ltd. Mr Poole has sufficient experience relevant to the style of mineralisation and type of deposit under consideration, and to the activity which he has undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Poole consents to the inclusion in this report of the matters based on this information in the form and context in which it appears.

The information in this presentation that relates to Exploration Results from the Excelsior & Bella Projects, USA, Picha & Charaque Projects, Peru and York Harbour Project, Newfoundland, Canada is extracted from the ASX announcements:

5 July 2023: Firetail signs binding terms sheet for acquisition of Peru Copper projects
14 November 2023: Encouraging First Assay Results from Picha Copper Project
5 February 2024: Significant polymetallic mineralisation at Picha Project
6 June 2024: Acquisition of York Harbour Copper Project, Canada
4 November 2024: Significant Grades Confirmed at Skyline
12 December 2024 : Exploration Gains momentum at Skyline Copper Project, Canada
16 December 2024: Drilling Extends High Grade Copper Mineralisation at Skyline
28 January 2025: New Target Identified at Picha Project, Peru
3 February 2025: Drill Results Set Stage for Growth at Skyline
10 February 2025: Multiple Substantial EM Conductors Defined at Skyline
9 April 2025: Exploration to refine porphyry potential at Picha Copper Project, Peru
2 June 2025 : Option Secured to Acquire Two High-Grade USA Gold Projects
18 June 2025 : Prospecting Identifies Copper Target Cover 800m Strike
24 July 2025 Geophysics strengthens porphyry potential at Picha Project
25 July 2025 Significant Landholding Increase at Excelsior Gold Project
29 July 2025 Geophysics Expands Discovery Potential at Excelsior Gold
20 August 2025: Exploration commences targeting high-grade gold at Bella
4 September 2025: Mammoth to Divest Paterson Cu-Au Project
25 September 2025: Geophysics Outlines Major Intrusive Target at Picha Project
7 November 2025: High-Grade Results Expand Blue Dick Trend, Nevada
11 November 2025: Significant Landholding Staked at Excelsior Project, Nevada
24 November 2025 : High-Grade Intercepts Extend Mineralisation at Excelsior Gold Project
26 November 2025 : Magnetics unveils multitude of targets at Excelsior
4 February 2026 : Drill results redefine Gold System at Excelsior
9 February 2026 : Patterson Divestment Completes as RC Drilling Accelerates
10 March 2026 : Acquisition of Historic Carlin Type Gold Mine, Nevada
18 March 2026 : RC Drill Results Expand Buster Gold Trend, Nevada
9 April 2026: Multiple High Grade Targets identified at Excelsior
15 June 2026: Bonanza Silver grades underpin potential in Nevada
14 July 2026 : High grade results define drill targets at Excelsiors North
12 August 2026 : Shallow Gold Results Expand Buster Potential in Nevada
31 August 2026 : Parallel High-Grade Gold Zone Intersected at Buster Trend

These announcements are available to view on the Company's website (mammothminerals.com.au). The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all the material assumptions and technical parameters continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

This presentation has been authorised for release by the Board of Directors

Directors & Key Management

COLLECTIVELY INVOLVED IN THE DISCOVERY OF >10Moz Au

BOARD OF DIRECTORS

Rob Jewson

EXECUTIVE CHAIR

Rob has a wealth of experience globally in corporate transactions, exploration and operational geology roles across the global mining sector. He brings over 19 years of experience specialising in identifying geological opportunities, developing project portfolios and commercialising resource projects.

Mr Jewson has been involved in multiple significant gold and mineral discoveries.

Glenn Poole

MANAGING DIRECTOR & CEO

Glenn is an experience geologist with a proven track record in discovery and revitalising mineral assets for ASX-listed Exploration and mining companies. He has held management roles at Firefly Resources, Superior Gold and Northern Star and Executive roles at Greenstone Resources. Mr Poole has been involved in the discovery and development of multiple gold and base metal resources.

Simon Lawson

NON-EXECUTIVE DIRECTOR

Simon is a Mining Executive with over 20 years industry experience, in both technical and corporate capacities. Most recently leading Spartan Resources to a $2.4b Merger with Ramelius Resources and has a strong track record of value creation through discovery and asset development. Mr Lawson also acts as Non-exec Deputy Chair for Ramelius, Non-Exec Director for Gorilla Gold. Mr Lawson also held senior management positions at Northern Star Resources

Kevin Puil

NON-EXECUTIVE DIRECTOR

Mr. Puil is the Managing Partner of US-based RIVI Capital LLC, a private equity firm specialising in precious metals. With over 25 years of experience in the resource investment sector, he brings a wealth of expertise as a former fund manager and investment analyst. Mr. Puil has significant experience in corporate governance, having served as an independent director for multiple mining companies. Mr. Puil currently serves a non-exec director at Dakota Gold (NYSE:DC)

MANAGEMENT & TECH TEAM

Craig McNab

CFO/Co-Sec

Craig McNab, a Chartered Accountant and Governance Institute Fellow, has 15+ years of experience in resources and accounting across Australia, New Zealand and the UK. Formerly with PwC, De Beers and Anglo American, he now focuses on corporate compliance and financial accounting for ASX-listed companies, including IPO management.

Alison Dines

EXPLORATION MANAGER

Alison is an exploration geologist with 15+ years in junior mining, working across various commodities and deposit types. Alison brings a strong technical focus in addition to extensive experience planning and executing drilling and exploration programs. Alison has greenfields and brownfields experience with gold, copper, lithium and base metal deposit types across global operating jurisdictions.

Jhony Vargas

PROJECT MANAGER - PERU

Jhony, an exploration geologist with 13+ years of experience, specialises in skarn, porphyry, epithermal and polymetallic vein deposits. He has worked on exploration projects in Peru with Kuya Silver, Miramont Resources and Newmont Goldcorp, among others.
Jhony has been leading the Peruvian exploration team since 2021 across both the Picha and Charaque assets.

Key Value Drivers

1. **Active RC Drilling program at Blue Dick Prospect – First ever drill holes across 6.5km of strike**
Drilling across multiple Silver, Gold and critical minerals targets

2. **Shallow Gold Mineralisation** across Buster Trend with opportunity for parallel mineralized trends open along strike and down dip

3. Advancing pipeline of targets across the Excelsior Land holding, including **Kentucky, Imperial, Railroad Springs** Prospects, to drill ready status through targeting mapping and sampling programs.

4. **Critical Minerals Exposure**
Targets advancing across the Excelsior Springs prospects host significant Silver, Antimony and Copper results in addition to Gold

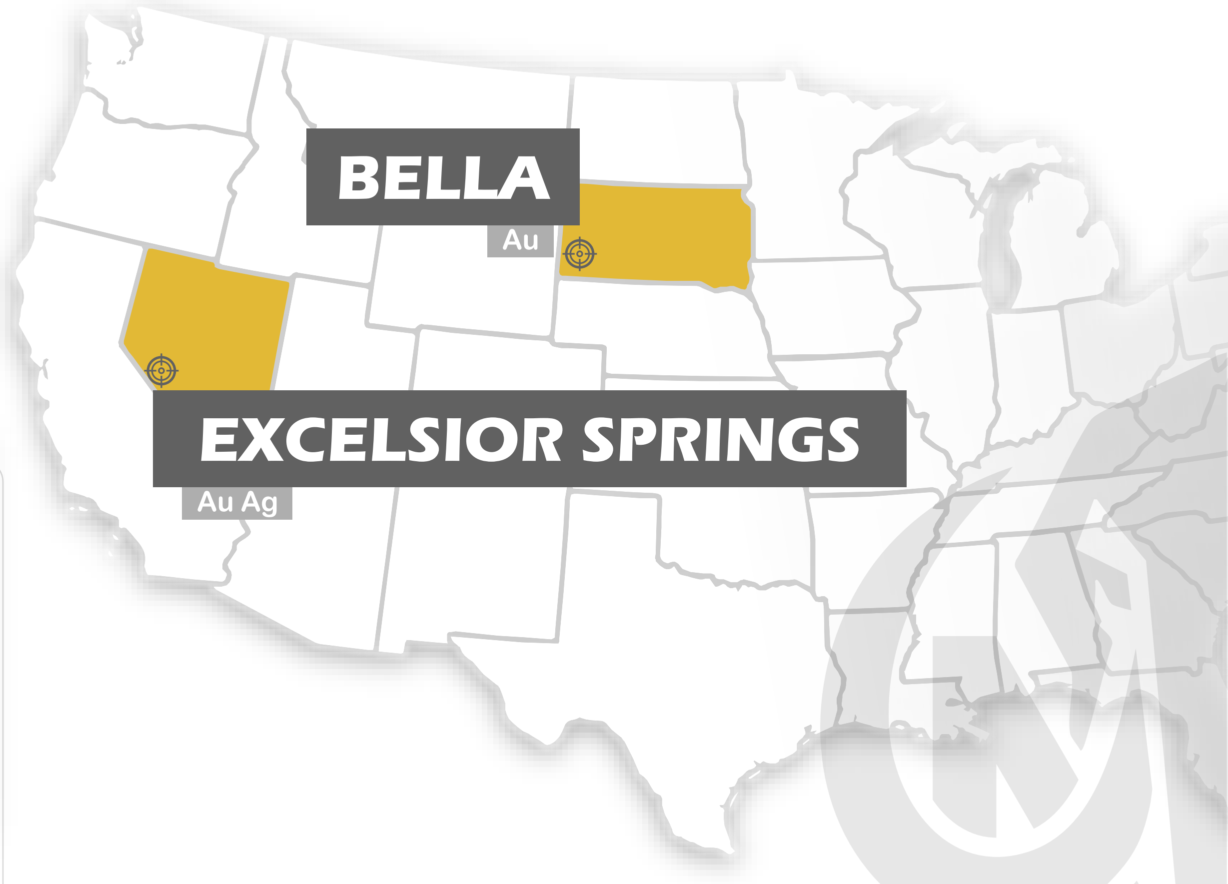
5. **Non-core asset divestment strategy** to support USA gold and precious metal focus
– Paterson divestment(C.$3m)
Active discussions underway for divestment of Picha Copper and Skyline Copper-Silver-Zinc assets

Value Proposition – Gold & Silver

Substantial Exposure to High-Grade USA Gold-Silver Projects

Excelsior Springs
Nevada, USA
Au, Ag, Cu, Sb

Bella
South Dakota, USA
Au



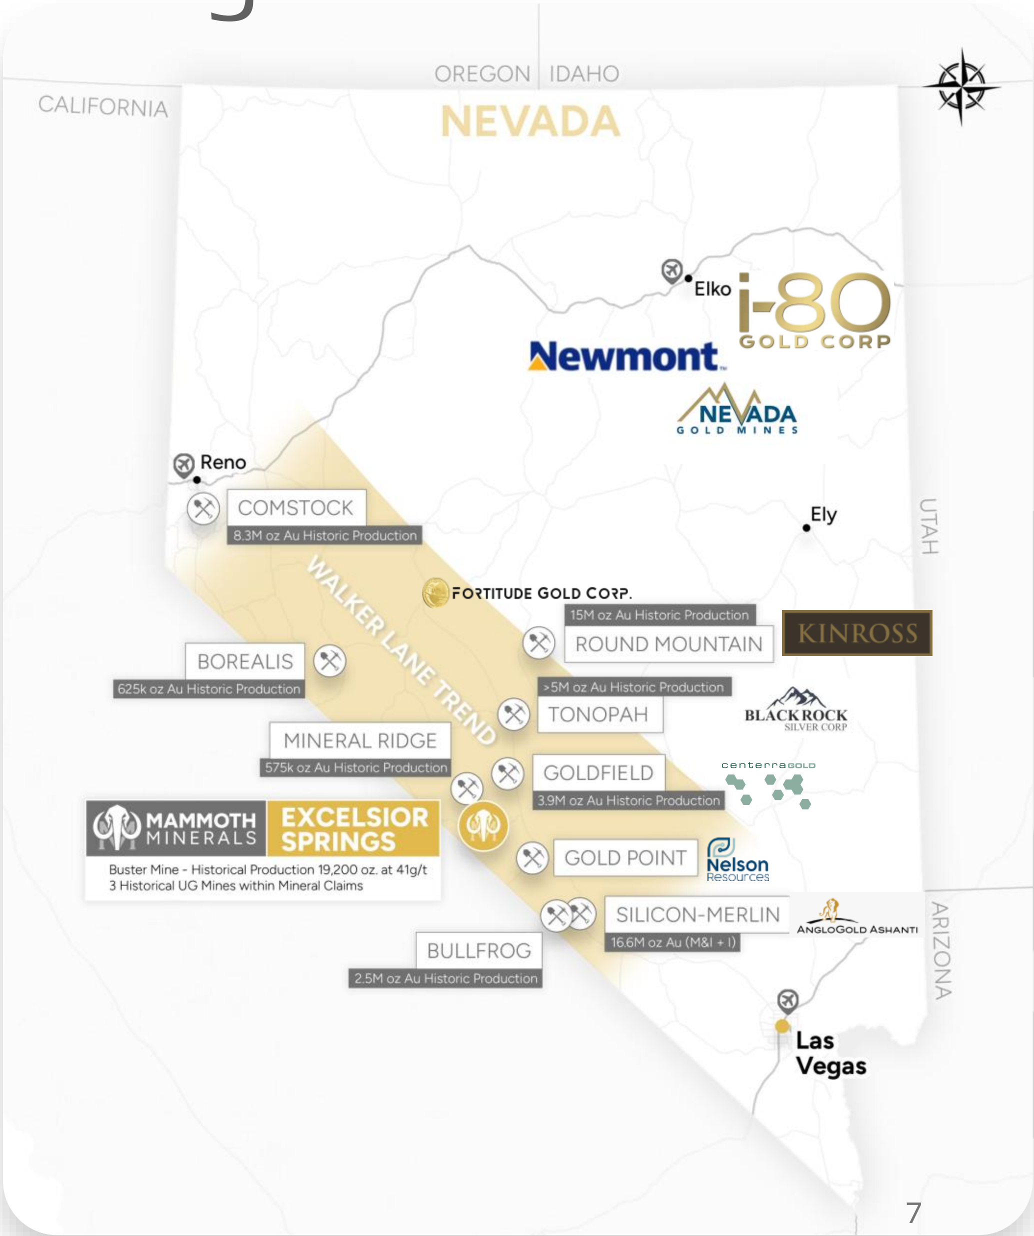
Nevada - The Heart of Gold Mining in USA

World-Class Endowment and Production

- Walker Lane Tectonic Zone is a **40-100km wide structural corridor** extending south-easterly from Reno towards Las Vegas - it has **produced >40Moz Au**
- **Diverse range of Gold deposit styles with Nevada representing 70% of US production in 2024**[1]
- In contrast with other well-endowed and notable trends in Nevada, Walker Lane has comparatively far **higher average mineral deposit grades**
- Recent M&A Activity in the Walker Lane within 100km radius of Excelsior[1,2,3,4]
  - Goldfield Project **US$206m** (US$279/oz Au) 706k oz. Au @ 0.71g/t Au resource
  - Crown Sterling **US$150m** (US$164/oz Au) 914k oz. Au @ 0.78g/t Au resource
  - Northern Bullfrog **US$450m** (US$170/oz Au) 1.46m oz. Au @ 1.65g/t Au resource
  - Reward/Bullfrog **US$134m** (US$82/oz Au) 1.64m oz. Au @ 1.13g/t Au resource
- **Actively explored, developed and operated by majors, including:**
  - Anglo Gold – Silicon-Merlin/Bullfrog
  - Black Rock Silver – Tonopah West
  - Kinross Gold – Bald/Round Mountain
  - Centerra Gold - Goldfield

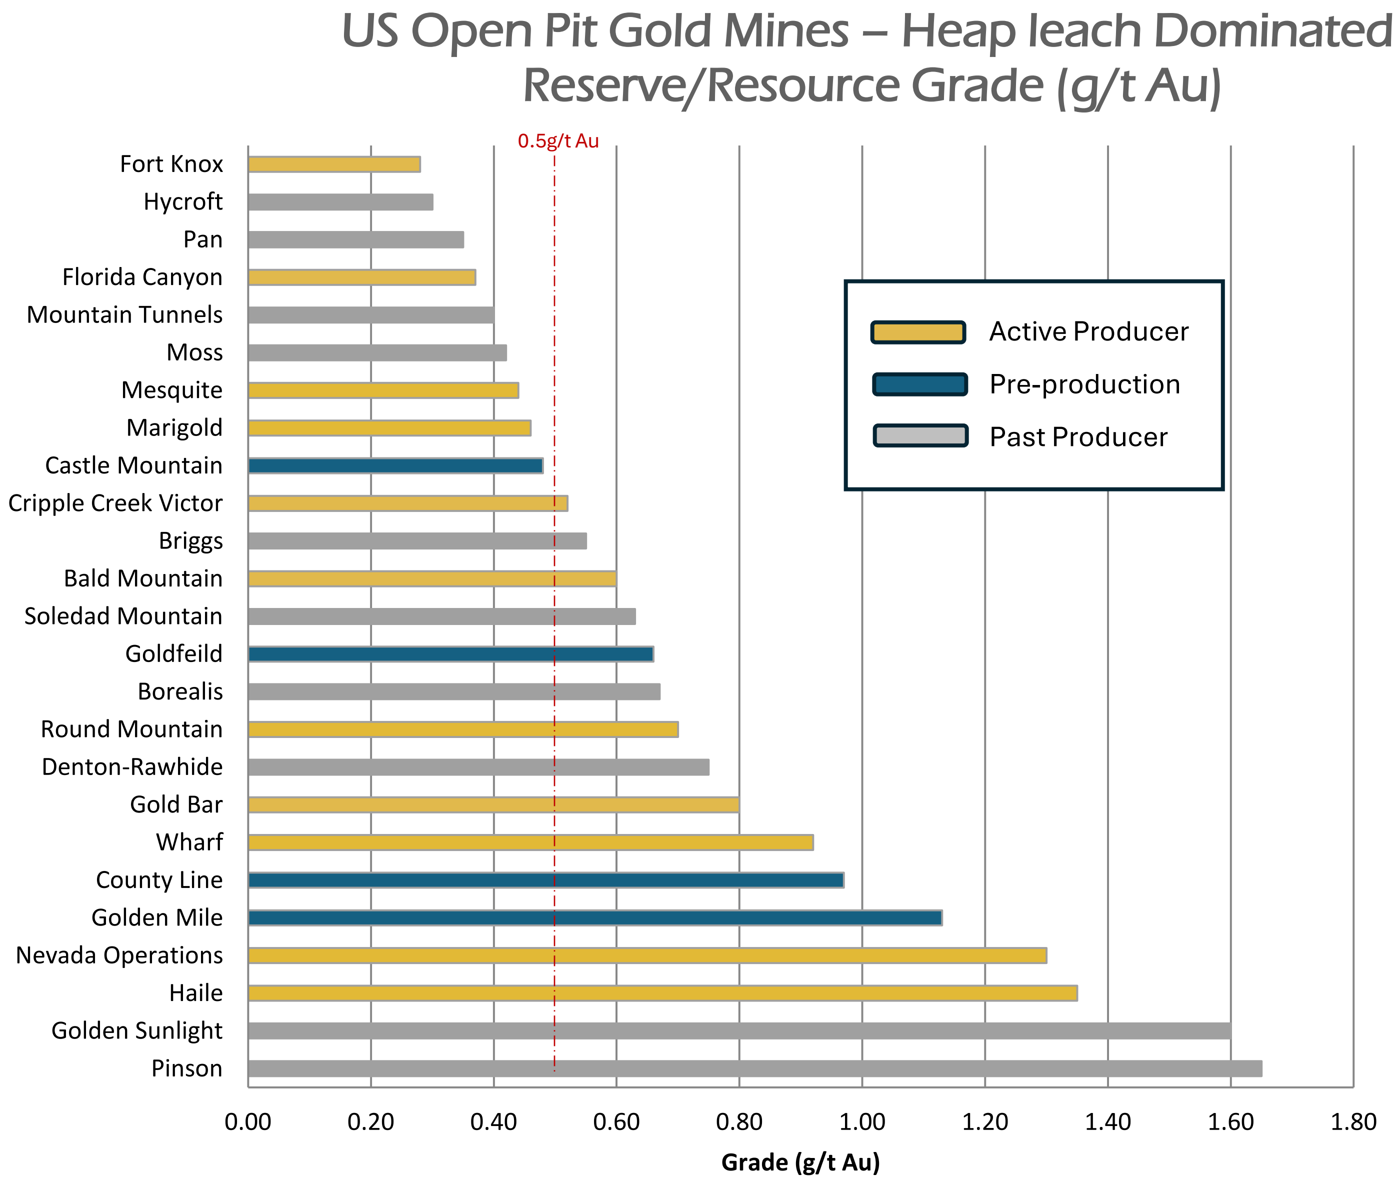
Operating Environment Cost Structure

- **Consistently rated by the Fraser Institute as a top operating jurisdiction globally**
- Local skilled labour force supporting exploration and mining activities
- **Favourable geological setting and operating cost structure** means that even extremely low-grade heap leach operations are viable in Nevada -



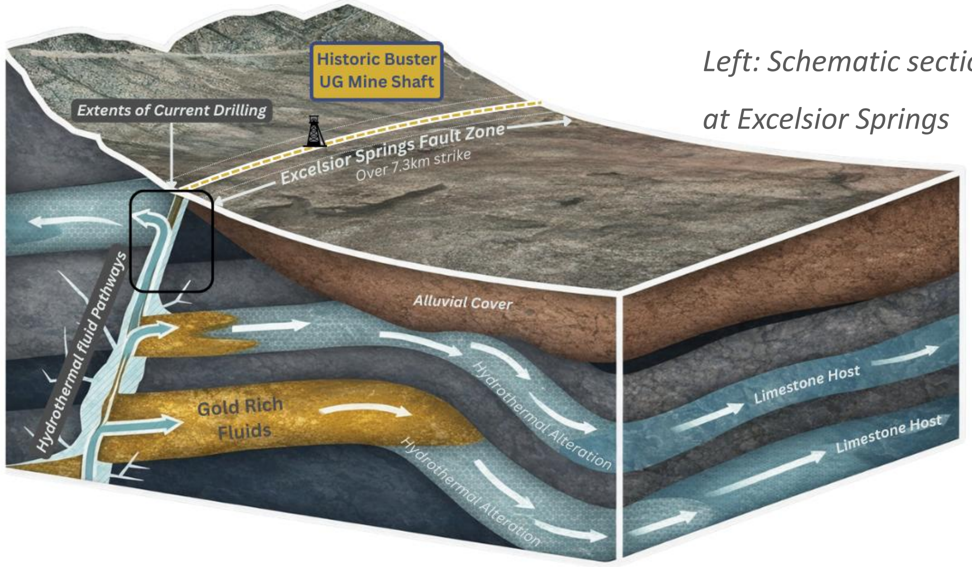
23/2/2022 – TSX: CG - Centerra Gold Announces Acquisition of the Goldfield District Development Project in Nevada
19/9/2022 – NYSE : CDE - Coeur Announces Agreement to Sell Southern Nevada Holdings for Upfront Cash Consideration of $150 million
16/7/2025 - NYSE: AU - AngloGold Ashanti Agrees to Acquire Augusta Gold to Further Consolidate Nevada District
13/9/2021 - NYSE: AU - AngloGold Ashanti Signs Definitive Agreement to Acquire Corvus and Consolidate the Beatty District of Nevada

Heap leach Gold– Metrics in Focus



- **Heap leach Extraction employed across numerous US states and global mining jurisdictions since inception and widespread adoption in 1960s**
- Highly altered rocks and/or weathered rocks of Nevada Great Basin, typical of Carlin-type mineralisation **amenable** to heap leaching methods
- Typically, Lower Cap-Ex/Low Op-Ex metrics support lower grade operations – Industry average of 0.5g/t
- **Heap Leach Operations support Nevada being a Top 5 Global Gold Producer as a standalone state.**
- Heap Leach Recovery accounts for over 30% of Global Gold and Copper Production
- Gold recoveries up to 95% via heap leach treatment
- Scalable due to simple design and operations

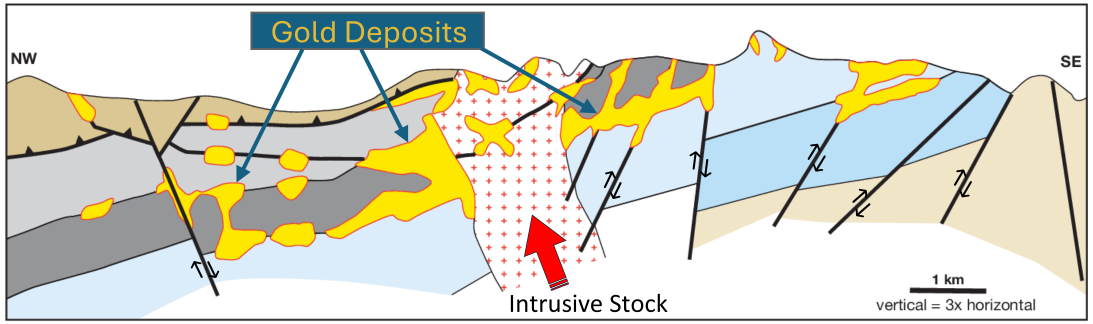
Great (Basin) Opportunity



Left: Schematic section of Buster Zone at Excelsior Springs

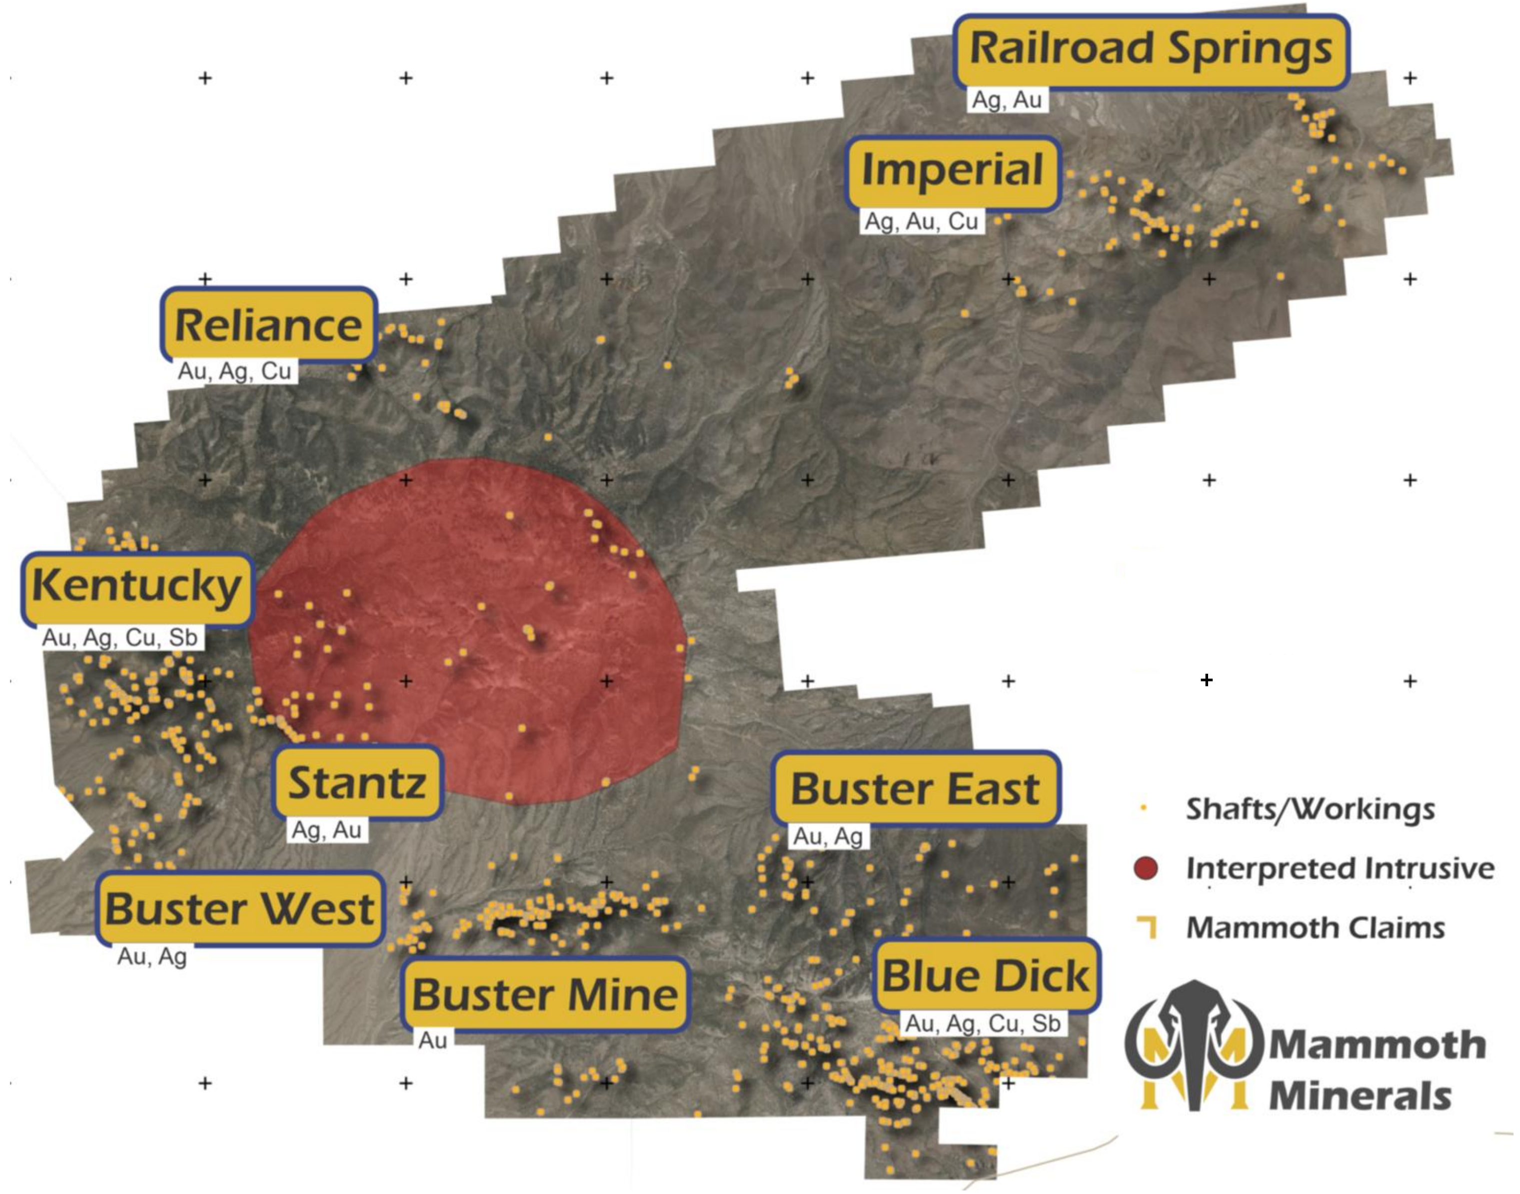
Building Blocks of multimillion ounce deposits

- Carlin Type Gold Deposits (CTGD) Model develop in 1960s – Unpannable “invisible gold”
- CTGD’s already host 255m oz. of Gold in Nevada, <u>all discovered in the last 60 years!</u>
- Mt Roberts sequence offers a sequence of highly permeable sediments – Heap Leach
- Diamond drilling has highlighted presence of key Carlin-Type indicators at Buster Trend



Above: Schematic Cross section of Basin and Range Block Movement providing fluid pathways

Commanding Land Position



Over 135km^2 of Highly prospective claims in a proven mineral district

- **Intrusive geology creating architecture in favourable lithology – Carlin-Type Limestones and Sandstones**
- Similar geology and deposit model to nearby Goldfield Caldera 35km north-east of Excelsior Project[5]
  - Over 4.2Moz produced, restarting production
- **Potential to host multiple styles of mineralisation**
  - **Stratabound (Carlin), Intrusive, Carbonate replacement, Epithermal and structurally controlled (Fault) hosted**
- Abundant Mineral occurrences coincidental with intrusive architecture – **Gold, Silver, Antimony, Copper**
- 7 Prospect zones with room to discover more
  - **Targeted field campaigns ongoing**

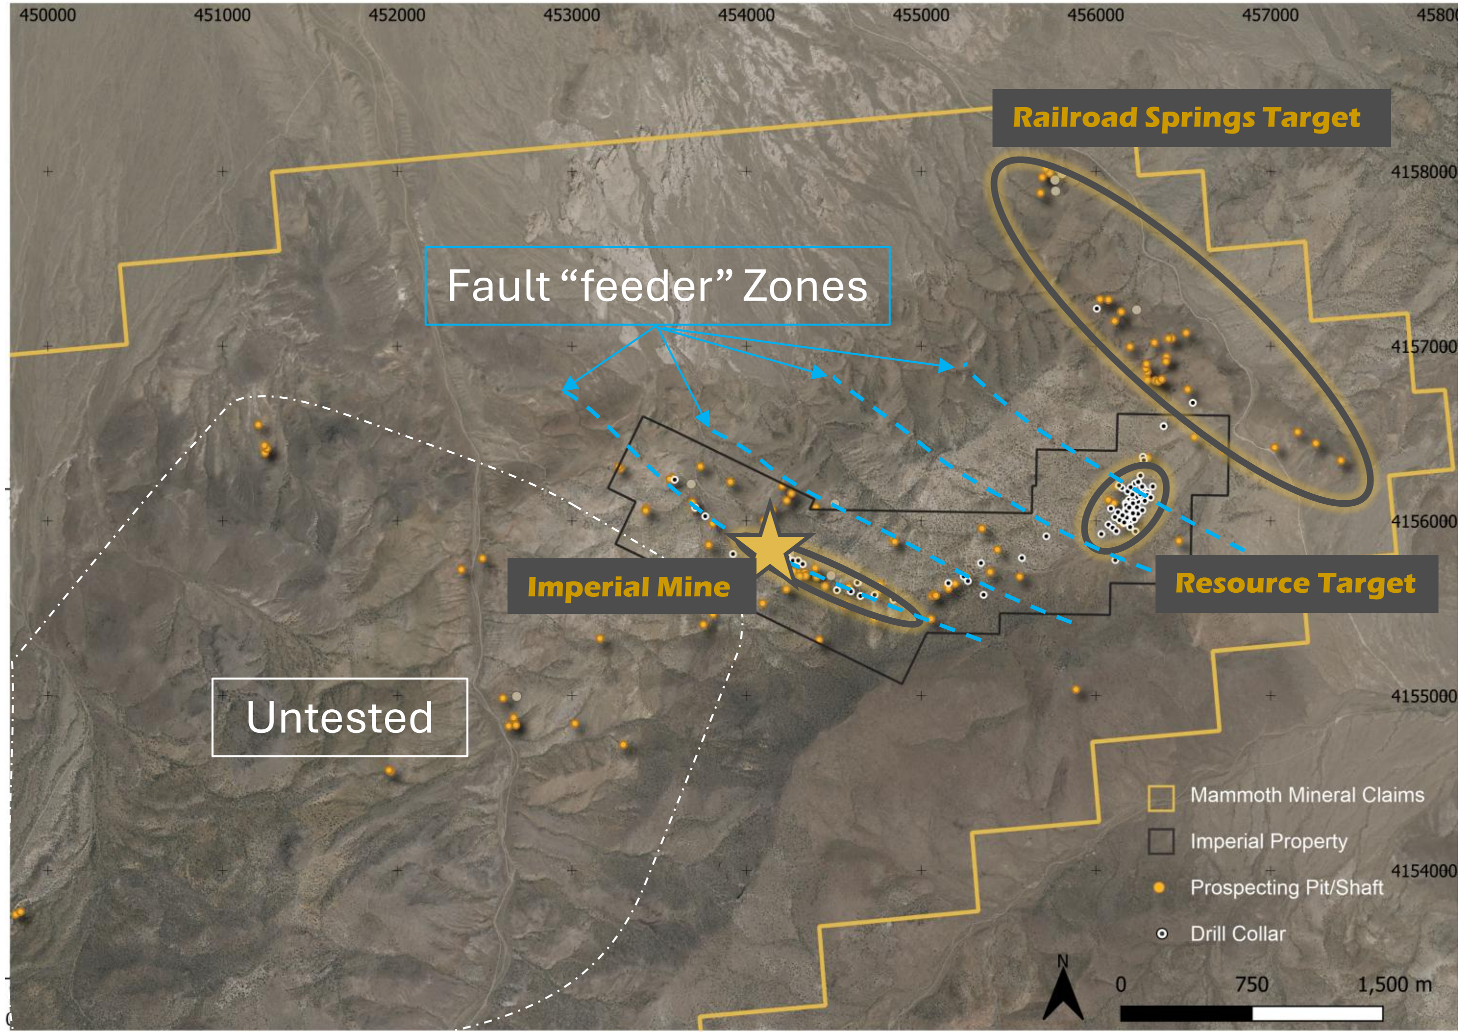
Nevada, USA - Gold

Buster Gold Trend

- **Drill-proven high-grade gold mineralisation**
- **7km strike length and 200-400m wide zone** based on drilling, geochemistry and geophysics
- Historic Buster Mine **produced 19Koz Au at 41g/t Au**
    - Previously mined shallow and surface exposures
    - Historically utilised small scale, boutique mining methods – growth opportunity
- **Phase 2 RC Drilling completed infilling and extending mineralisation 700m east to Lunchbox Ridge**
    - MEXRC2637 - 10.67m @ 3.76g/t Au from 198.2m including 4.6m @ 6.86g/t Au from 199.7m
    - MEXRC2635 - 22.9m @ 1.37g/t Au from 10.7m including 3.0m @ 4.15g/t Au from 22.9m
    - MEXRC2634 - 12.2m @ 1.57g/t Au from 32m including 4.6m @ 3.31g/t Au from 38.1m

Nevada, USA - Gold

Imperial Opportunities



- **Historic Gold mine – ceased at commencement WWII**
- Sediment host, alteration and mineralisation mapped support "Carlin-style" mineralisation
- Over 6.5km of drilling completed across 2 target zones
- Parallel Target Zones identified at Imperial Mine
  - Repeating structures for mineralising fluids
- Geophysics highlights further potential targets and extensions into newly staked ground

Significant Drill results include:

- 28.96m at 2.23g/t Au from 3.05m – IR-29
- 13.72m at 4.74g/t Au from 30.48m – IR-4
  - Incl. 3.05m at 15.61g/t from 32m
- 10.67m at 2.48g/t Au from surface- IR-22
- 10.67m at 1.68g/t Au from surface – LRC-90-4

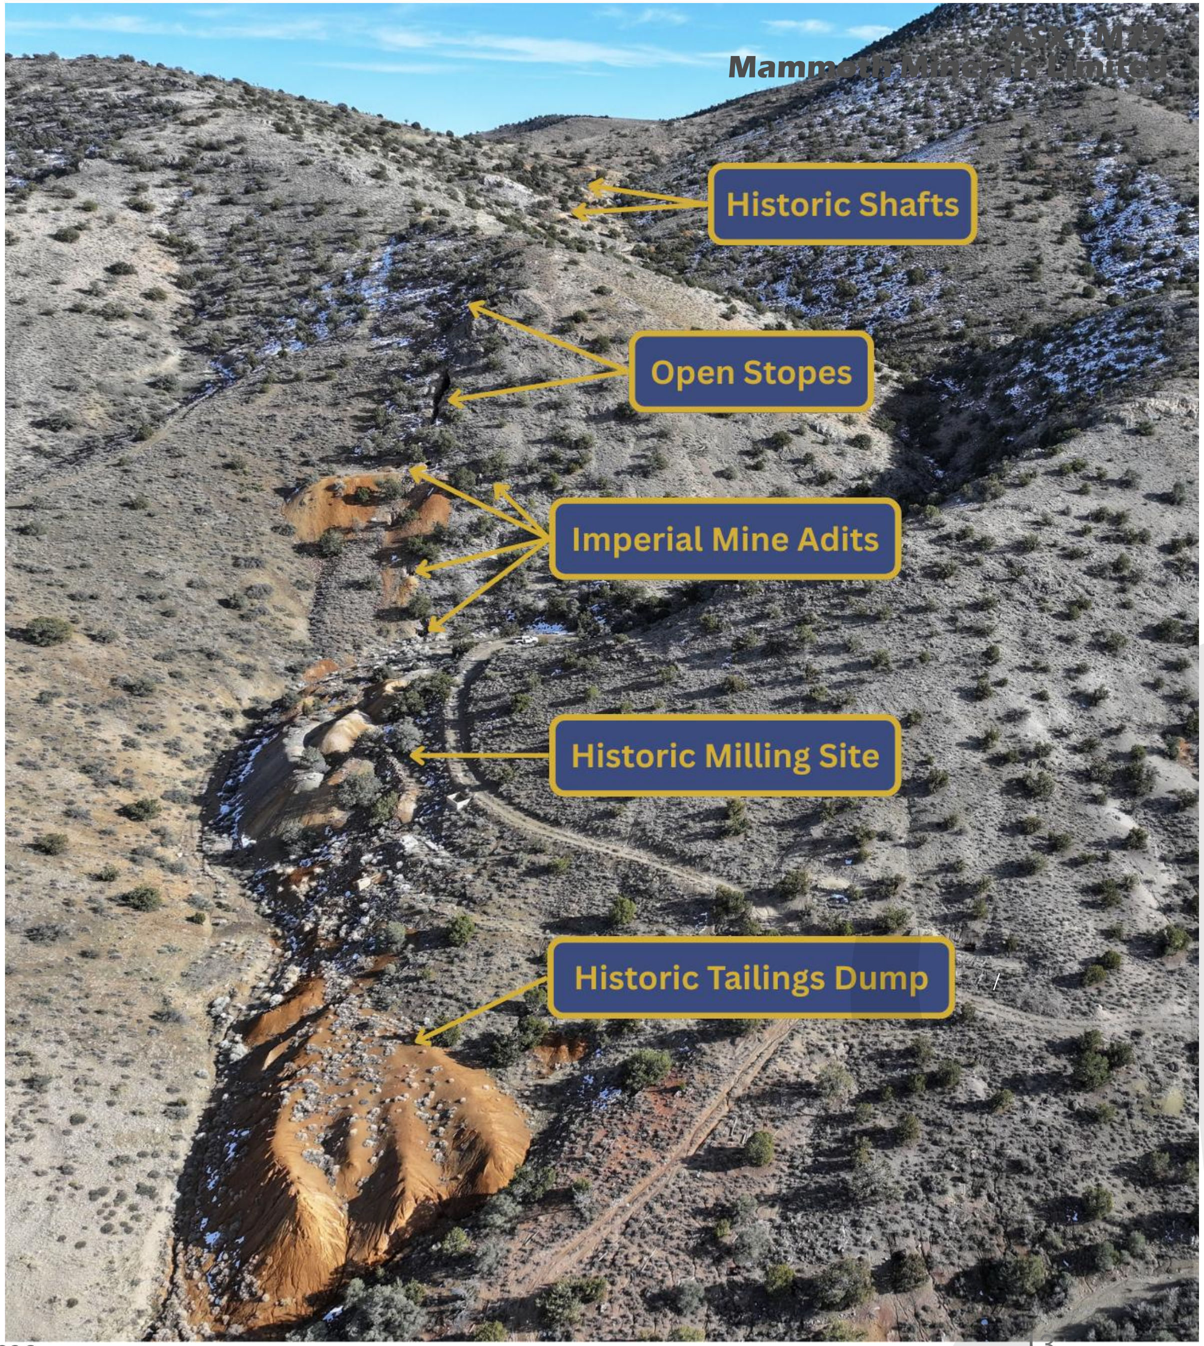
Nevada, USA - Gold

Imperial Gold Mine

- **Significant UG workings exposed at Surface**
- Historic Gold Extracted on Site via VAT leaching
    - Pre-curser to conventional heap leach methods
- Imperial Mine has a strike of over 1.3km of adits and historic shafts
- Historic production of approx. **10kt at over 15g/t Au**
- Historic Adit Sampling results include:
    - **0.76m at 237.51 g/t Au** – IUA175
    - **1.22m at 15.77g/t Au** – IUA10
    - **0.76m at 47.17g/t Au** – IUA128
    - **0.91m at 19.13g/t Au** – IUA120
    - **0.91m at 15.46g/t Au** – ILA510
- Walk up drill targets on down dip and along strike extensions

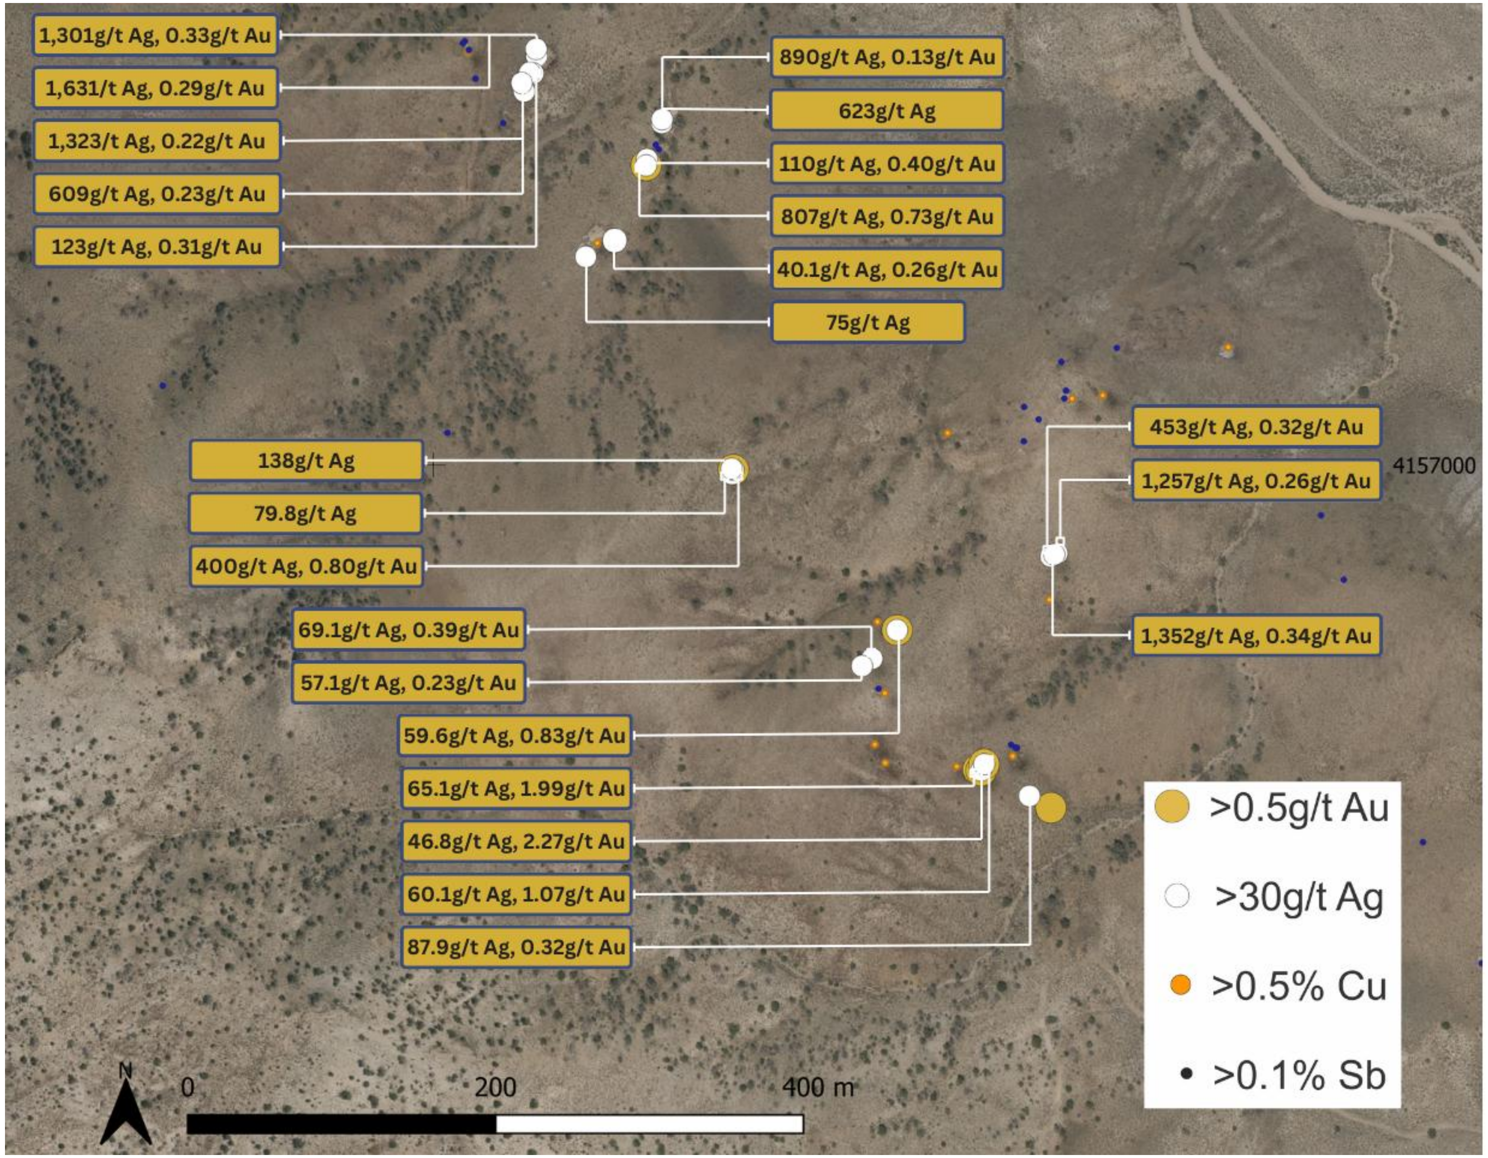
    – Drilling Scheduled for Q4 – Site works underway



[1]Refer to ASX Ann. "Mammoth Strengthens Nevada Gold Portfolio with Acquisition of Carlin Type Gold Mine" 10/3/2026

Nevada, USA - Gold

Railroad Springs Trend



- Part of Mineral Claim staking completed Q1 2026
- Broad Trend of historic Shafts and workings
- Parallel Trend to Imperial Fault – Same host lithology
- Strike of over 650m
- Silver dominant with supporting gold grades
  - 1,352g/t Ag, 0.34g/t Au
  - 807g/t Ag, 0.34g/t Au
  - 1631g/t Ag, 0.29g/t Au
- Area untested by modern Exploration
  - Ongoing Mapping and Sampling programs
  - Maiden RC drilling program planned for Q4

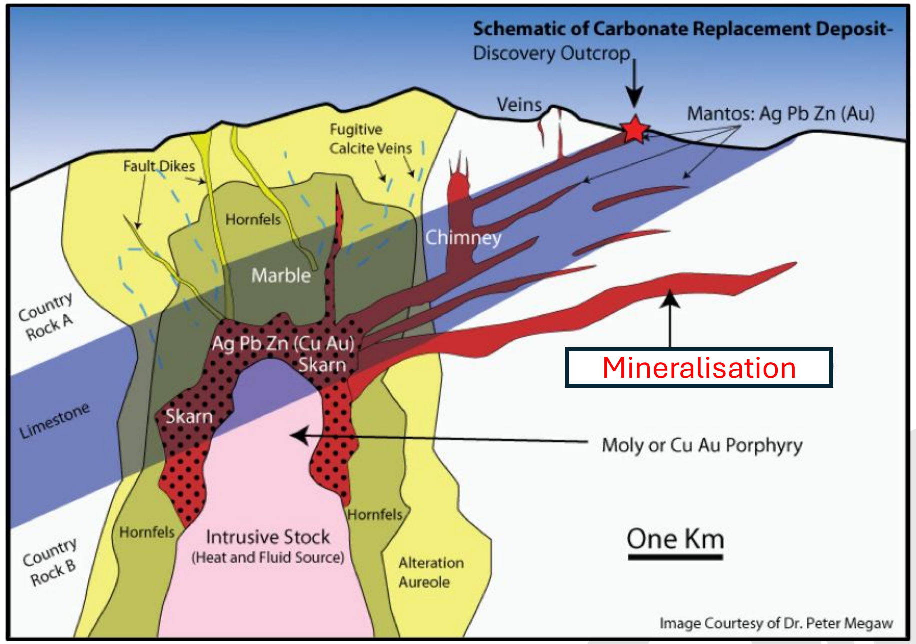
Nevada, USA - Gold

Blue Dick Trend– Critical Minerals in Focus

ASX : M79
Mammoth Minerals Limited

- **Gold/Silver-Lead-Zinc Carbonate Replacement type deposit (CRD)**
- Significant stope fronts open to surface
  - Limited Mining Extents – **Open strike**
  - Shallow development – **Open at Depth**
- Zones of Mineralisation typical of CRD[1,2,3]
  - **Gold Grades up to 42g/t Au**
  - **Silver Grades up to 17,582g/t Ag,**
  - **Antimony Grades up to 1.9% Sb**
  - **Copper Grades up to 10.1% Cu,**
  - **Zinc Grades up 9.8% Zn**
  - **Lead Grades over 20% Pb**



Above: Blue Dick ore sample[1]

Left : Mineralised zone in Underground workings

Blue Dick Polymetallic System

- **RC Drilling program underway across priority zones – Assays Pending**
- High-grade polymetallic vein system underpinned by significant gold values
- Cumulative strike length of over 7km of historic workings – Sampling ongoing
- **Recent sampling highlights grade potential[1]**

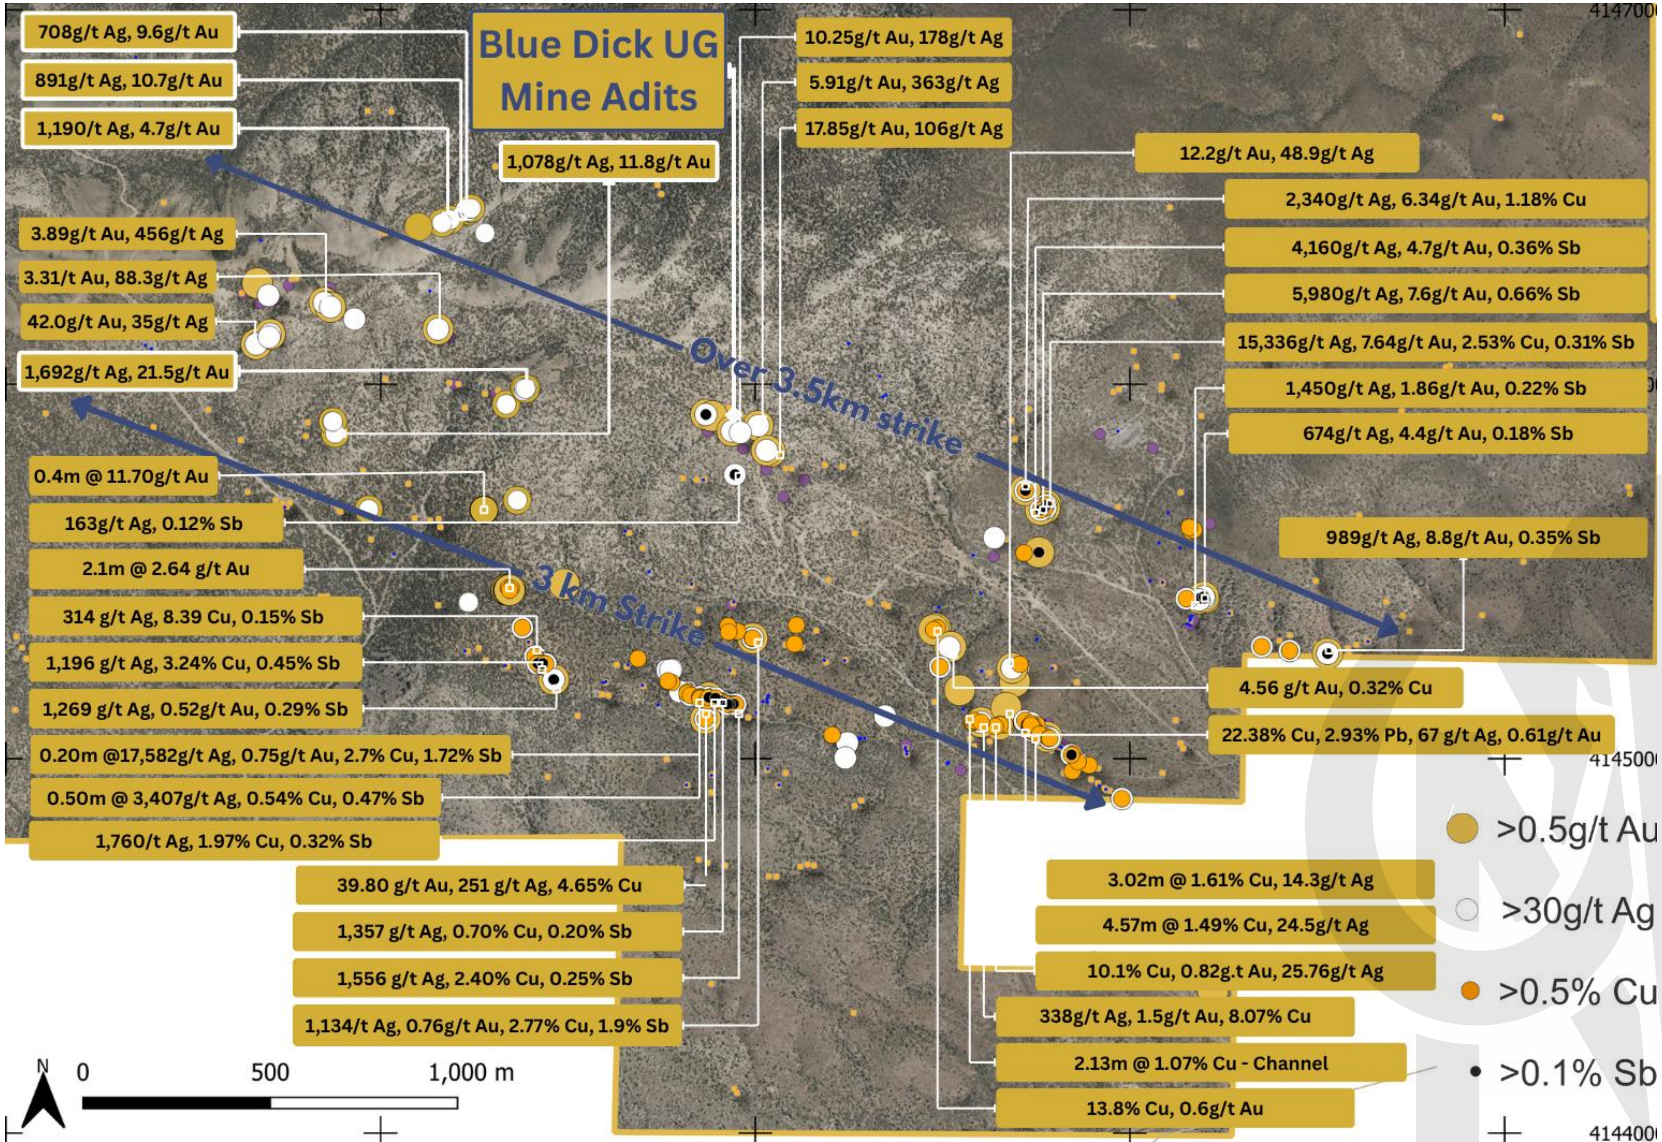
➢ **<u>0.2m</u> @ 17,582g/t Ag, 0.75g/t Au, 1.72% Sb**

➢ **<u>0.5m</u> @ 3,407g/t Ag, 0.54% Cu, 0.47% Sb**

➢ **15,336g/t Ag, 7.64g/t Au, 2.53% Cu, 0.31% Sb**

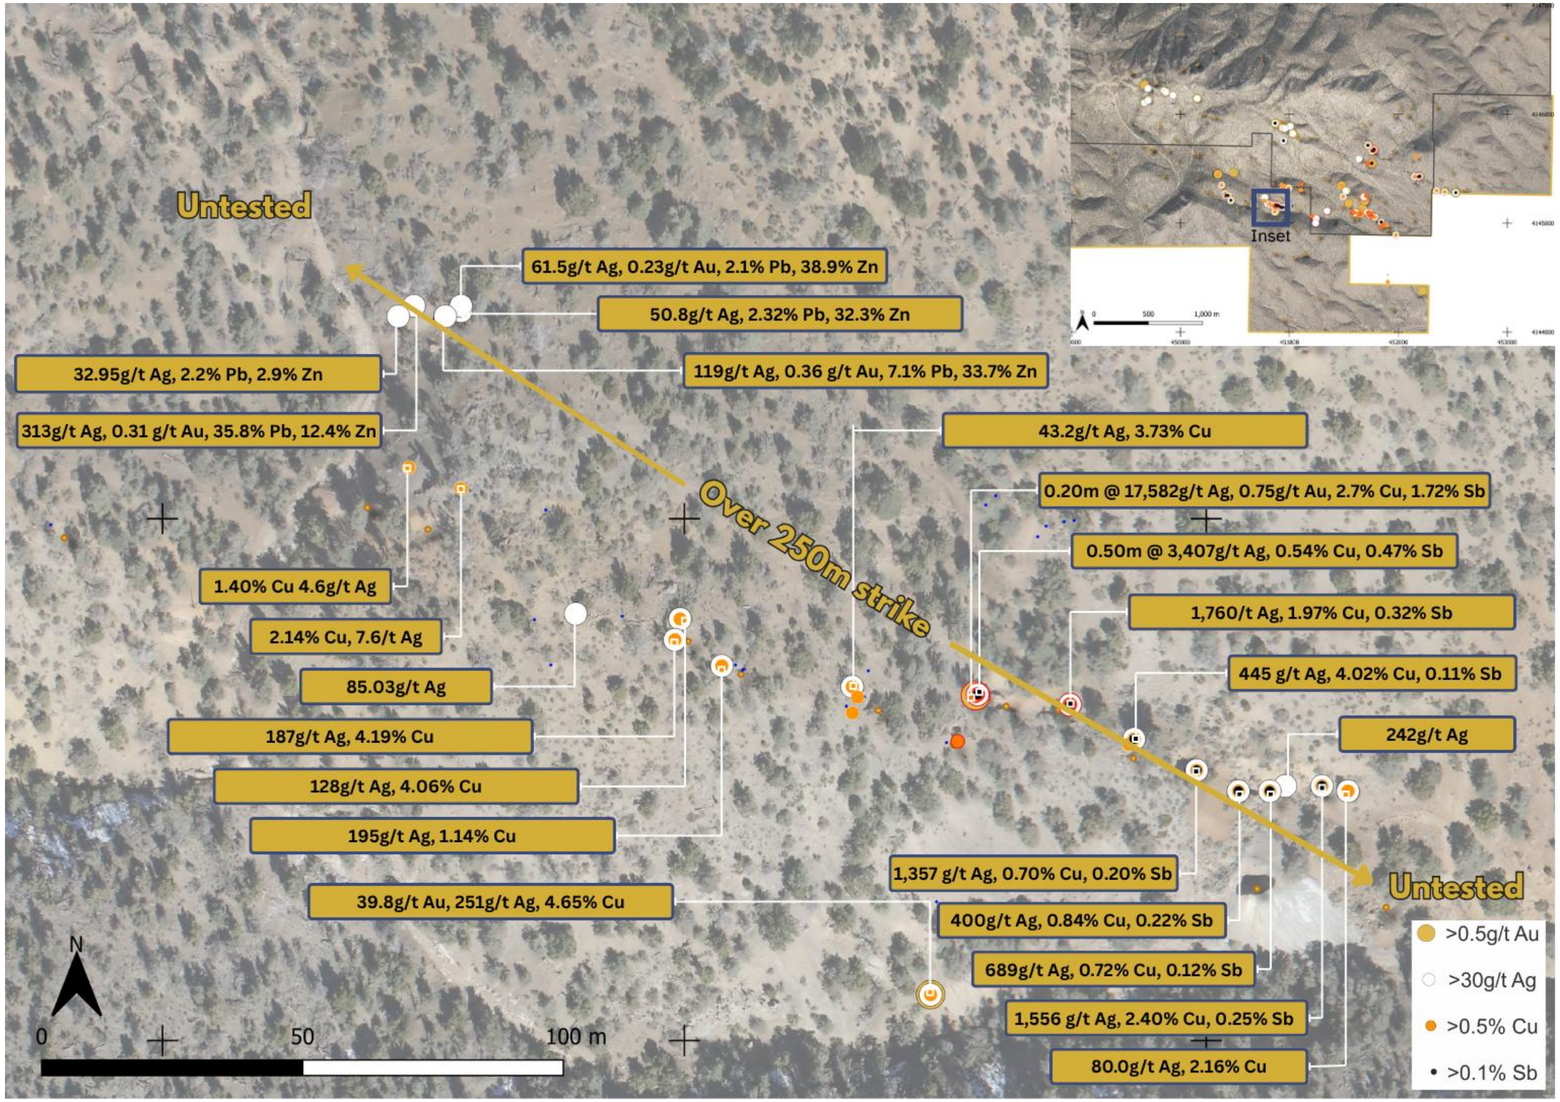
➢ **5,980g/t Ag, 7.60g/t Au, 0.66% Sb**

➢ **39.8g/t Au, 251g/t Ag, 4.65% Cu**



[1]Refer to ASX Ann. "High-Grade Results Expand Blue Dick Trend, Nevada" 07/11/2025
[2] Refer to ASX Ann. "Multiple High-Grade Targets identified at Excelsior" 9/4/2026

Defined Polymetallic Targets



- **Strong grade continuity over significant 250m strike length – remains open**
- Significant historical workings targeting High-grade polymetallic vein system – Carbonate Replacement Type Deposit
- Hosting Gold and 5 elements on US Critical minerals list, Silver, Copper, Antimony, Lead, Zinc
- **Significant sampling results include**

➢ **<u>0.2m</u> @ 17,582g/t Ag, 0.75g/t Au, 1.72% Sb**

➢ **<u>0.5m</u> @ 3,407g/t Ag, 0.54% Cu, 0.47% Sb**

➢ **1,760g/t Ag, 1.97% Cu, 0.32% Sb**

➢ **1,556g/t Ag, 2.40% Cu, 0.25% Sb**

➢ **1,357g/t Ag, 0.70% Cu, 0.20% Sb**

[1]Refer to ASX Ann. “High-Grade Results Expand Blue Dick Trend, Nevada” 07/11/2025

[3]Refer to ASX Ann. “Bonanza Silver results underpin potential in Nevada” 15/6/2026

Nevada, USA - Gold

Defined Polymetallic Targets

- **Significant Copper Grades supported by strong Gold and Silver values at surface**
- Over 550m of strike proven and trend remains open to the North
- Key target for drilling commencing in Q3 – the first modern exploration on this ground
- **Significant sampling results include**

➢ **4.57m @ 1.49% Cu, 24.5g/t Ag**

➢ **5.84m @ 0.99& Cu**

➢ **338g/t Ag, 1.55g/t Au, 8.1% Cu**

➢ **12.2g/t Au, 48.9g/t Ag**

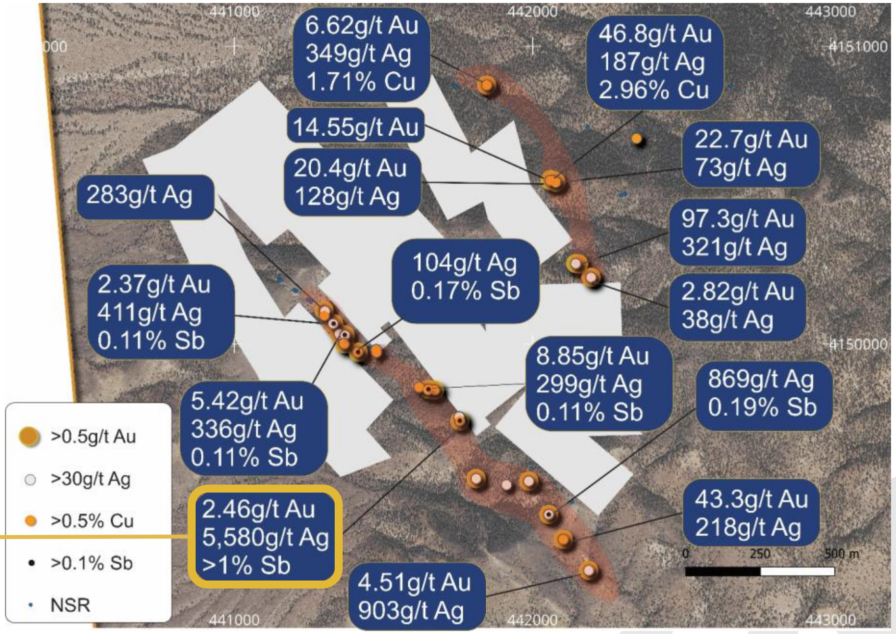
➢ **10.1% Cu, 0.82g/t Au, 25.76g/t Ag**

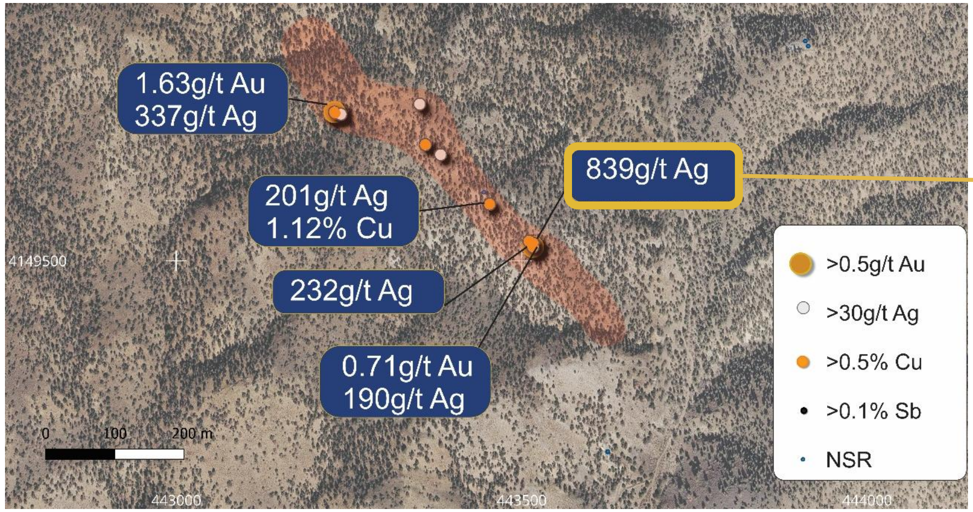
[1]Refer to ASX Ann. "High-Grade Results Expand Blue Dick Trend, Nevada" 07/11/2025
[2] Refer to ASX Ann. "Multiple High-Grade Targets identified at Excelsior" 9/4/2026
[3]Refer to ASX Ann. "Bonanza Silver results underpin potential in Nevada" 15/6/2026

Building out the pipeline of targets

- **High calibre Gold and critical minerals Prospects**
- Extensive historic workings supported by prospecting and sampling activities
- **Kentucky Trend**: Rock chip results of up to 5,580g/t Ag, >1% Sb, 2.46g/t Au 1.95% Cu, along a 1,500m strike trend with significant historical mining activity.
- **Stantz Trend**: Rock chip results of up to 839g/t Ag, 0.48g/t Au, 1.28% Cu, 11.1% Pb along a 1,300m strike trend that contains multiple shafts and adits.
- **Buster East**: Rock chips of up to 28.7g/t Au, 159g/t Ag located 1.4km along strike to the east of the Buster Trend, which has been the focus of recent drilling.

MREX00310 – 5,580g/t Ag, 2.46g/t Au, >1% Sb 1.95% Cu





MREX00233 – 839g/t Ag, 1.28% Cu, 19.6% Pb

Mammoth Minerals

Key Reasons to Invest

BLUE DICK, NEVADA – Au/Ag-Cu-Sb	Active RC program underway targeting high grade trends identified in the recent field mapping programs Drill targets returning significant Silver, Gold and Critical mineral values with potential to feed US supply chains
BUSTER TREND, NEVADA - Au	Recently completed drilling redefined Gold potential across buster trend with parallel trends still open in multiple directions, expanding mineralised footprint and growth opportunities
IMPERIAL/KENTUCKY, NEVADA - Au,Ag,Sb	Emerging targets and trends returning bonanza Silver and Gold surface sample results along side significant Critical minerals Copper, Antimony, Lead and Zinc. Advancing to drill ready status in Q4 2026
Portfolio Optimisation	Commercialisation of Picha Copper and Skyline Copper-Zinc assets to support gold and critical mineral strategy
